

FEATURES:

Build Lessons:

- build, recall, edit, reuse, share, and organize all daily lessons
- align lessons to state standards & local curriculum
- attach web resources to lessons
- create teaching teams
- strategically teach to standards by searching a perpetual library of the district's aligned lessons
- quantitatively evaluate textbook use in lessons
- instantly access classroom lessons and observe addressed standards in real time

Map & Build Curriculums:

- instantly access state standards and other models
- create, critique, and edit individual and group curriculum maps based on the Heidi Hayes Jacobs method
- create and edit course of study by using state and national standards and or local curriculum maps

myLessonBuilder is a powerful tool for today's education environment. This web application allows teachers and teaching teams to create, organize, and save daily lesson plans as well as store lesson resources, such as worksheets, documents, web links, pictures, videos and more. As a virtual plan book, myLessonBuilder maximizes limited planning time.

Unique alignment functions assure accountability and consistency of curriculum. Completed lessons may be dynamically aligned to state, local, and other curriculum models. Standards are easily navigated for quick grade level and subject specific lesson alignments. Administrative functions may be used to enter, align, and maintain local course of study -- create a dynamic, living curriculum.

The optional sharing function lets teachers choose to make individual lessons and resources available to other team members. In addition, schools who implement curriculum mapping models will value myLessonBuilder's mapping component. This helps teachers and teams construct, review and edit curriculum maps. myLessonBuilder makes real time collaboration a reality.

As a web application, myLessonBuilder eliminates the cost and time associated with installing and maintaining software on district servers and workstations. Upgrades and new features are updated instantly. The web also enables convenient access from home.

The Primax Group creates solutions for districts who prioritize continuous improvement, integrate technology and want to simplify standards based instruction. myLessonBuilder brings curriculum into the classroom and still gives teachers enough time to teach.

FEATURES:

Map & Build Curriculum:

- instantly access state standards and other curriculum models

Visit <http://CurrMapper.com>

CurrMapper is a powerful tool for today's education environment. This web application allows administrators, teachers and teaching teams to manage and assess curriculum and curriculum maps.

Standards are easily navigated for quick grade level and subject specific map alignments. Administrative functions may be used to enter, align, and maintain local course of study -- create a dynamic, living curriculum map.

CurrMapper eliminates the need for printed distribution of curriculum and maps, yet allows printing of maps and curriculum on demand. CurrMapper will allow you to see your maps in ways paper is unable to.

As a web application, CurrMapper eliminates the cost and time associated with installing and maintaining software on district servers and workstations. Upgrades and new features will be made by The Primax Group. The web also enables convenient access from home. Basically, any time you have internet access you can log into CurrMapper.

In addition, implementing myLessonBuilder with CurrMapper will allow teachers to align lessons to curriculum maps and curricula items. myLessonBuilder helps teachers and teams construct, review and edit lessons and makes real time collaboration a reality.

The Primax Group creates solutions for districts who prioritize continuous improvement, integrate technology and want to simplify standards based instruction. CurrMapper brings curriculum into the classroom and still gives teachers enough time to teach.
